The Hitchhiker's Hack

Use the "Options" button to translate the program in English.

I. [Functions (Private)]
These functions must be used on Private servers only
(Never use it on live server !)

Overall speed: Affect all speeds (running, swimming, flying...)
Speed: Running and swimming speed
(default = 7)
(100% = 14)
in percents: Display your speed in % (for example, if you put the speed to 14, it will display 100%. That mean Speed 14 = 100% epic mount)
Fly Mod: Allow you to fly
(default = 7)
(280% = 26.6)
(310% = 28.7)
Freeze Z: Allow you to walk at the same heigh without falling
NoClip 1: Your character can go through EVERYTHING (even ground). **It's higly advisable to use this function with Freeze Z or Fly mod.**
Walk-on-water: Allow you to walk on water
Walk-under-water: Allow you to walk under water
Use mount in interior: Allow you to mount even in interior
Wallclimb: You can climb every mountains
NoCooldown: Remove the global cooldown on Spells **(Instant cast and Spell without cooldown only)**
Walljump: Allow you to hang you on mountains (kind of wallclimb)
Multi-jump: Allow you to jump in the air
Super-jump: Allow you to jump higher
(Put the value you want in the Inputbox bellow)
Faction: Allow you to change of faction (You can attack player of your faction if they are PVP enabled on no-fixed server)
Unstuck !: Display a window in the foreground who allow you to unstuck you character if you are stuck by a spell (ex: Entangling roots)
**Stop falling:** Display a window in the foreground who allow you to stop your character falling.
TP Target (back): Teleport you in the back of your target (like rogues)
TP Target (Undermap): Teleport you behind your target and under the map. So you can attack them with spells or with ranged weapons (Be careful when you're undermap, you can fall easily ! You should use the Freeze Z function)
Disable M2 collisions: Allow you to go through "objects" (trees, etc.)
Disable WMO collisions: Allow you to go though buildings
Noclip: Disable M2 + WMO collisions

Tracking: Allow you to track units on your minimap (like hunters) and to display ressources.

- **XYZ:**

Activate XYZ: Allow you to teleport you character with the Numpad.
XYZ Speed: Teleport speed.

(Numpad)
7: Up
9: Down
8: Forward
5: Backward
6: Rigth
4: Left

- **Teleportation:**

Map: Map ID of the map you are on.
X,Y,Z: Your coordinates.
*: Copy current coordinates into the left columns
(Destination coordinates)
Teleport: Teleport you to the XYZ coordinates
Go to corpse: Teleport you to your corpse.
List: Display the Teleport list.
Click to TP: Allow you to teleport your character where you click using the Right click + Shift or Ctrl or Alt (choose it in the Shortcut window). You have to activate the "Click to move" option to make it work ! (Ingame: Escape -> Interface -> Mouse -> "Click to move").

> **Most used MapID:**
> 0 = Eastern Kingdom (also named Azeroth in teleport list)
> 1 = Kalimdor
> 571 = Northrend
> 530 = Outland, Quel Danas, Bloodelf spawn and Draeneï spawn

- **Shortcuts:**

They can be assigned by the Shotcut button (you have to check the Shortcut's checkbox to make them active). Only use ONE unique shortcut per function.

II. [Functions (Live serv.)]

These functions can be use on Live or Private servers.

Wallclimb: You can climb every mountains
Walljump: Allow you to hang you on mountains (kind of wallclimb)
Walk-on-water: Allow you to walk on water
Walk-under-water: Allow you to walk under water
Super-jump: Allow you to jump higher
(Put the value you want in the Inputbox bellow)
Faction: Allow you to change of faction. You won't be able to attack the membre of your faction, but you'll be able to see the level/PvP stats/talents/... of members of the opposite faction.
Disable M2 collisions: Allow you to go through "objects" (trees, etc.)
Disable WMO collisions: Allow you to go though buildings
Noclip: Disable M2 + WMO collisions

Tracking: Allow you to track units on your minimap (like hunters) and to display ressources.

• **XYZ:**
Manual: One keypress move your character of a step.
Automatic: One keypress move your character continuously (To stop moving, press the 1 key of the Numpad) **/!**

(Numpad)
7: Up
9: Down
8: North
5: South
6: East
4: West
1: Stop moving (If you're in Automatic mod)

/!** **Please, disactivate XYZ when you want to type something. If you press a Numpad key while you're typing, your character will be teleport without turning, so you'll be disconnect if you move.

No-Clip Action: Teleport you a bit forward by pressing the shortcut key (Default: F3).
(DONT USE IT CONTINUOUSLY ! Only on VERY short distance (to go through a wall/door for example)))

• **Shortcuts:**
They can be assigned by the Shotcut button (you have to check the Shortcut's checkbox to make them active). Only use ONE unique shortcut per function.

III. [Player]
(Client-side only)
(Work on Live server)

Alcohol: Make you drunk !
Titre: Display a title before your pseudo. You need to Disactivate/Activate your name in options to see it (Clientside only)
Emote on target: Play selected emote on your target (if no target is selected, emote is play on you)
Reveal the map: Reveal all the map (Don't give any achievement and have to be reactivate after any loading)

- **Scale:**
Scale +: Make you character bigger (with collisions)
Scale -: Make you character smaller (with collisions)
Scale: Character's scale (without collisions)
Height: Heigth of your character (collision only)
Width: Width of your character (collision only)
Reset: Reset your original scale

- **Player:**
Dead: Show your character dead (Clientside only)
Invisible: Make your character disapear (Clientside only)

- **Camera:**
Spectate mod: Allow you to move your camera only (You can change the speed with the inputbox (Default speed: 40))
No Clip: Allow you to go through everything with your camera in Spectate mod.
Follow target: Allow you to put your camera on your target to follow her. Use arrows to turn around the selected target.
**TP Camera (Private serv.):** Teleport you to your camera (Private servers only !)

- **Time:**
Hours: Set the hour of the game.
Minutes: Set the minutes of the game.
Speed: Set the time speed.

IV. [Teleport List]

Here is the Teleport list who can be display by the "List" button (Functions Privates)
(Don't use it on Live server !)

To add a destination: Put the name you want (must be unique in the list !) and click on "Add TP". Your destination will be add at the end of the list, in the category "Destinations ajoutées manuellement".
To delete a destination: Put it number (Left column) and click on "Delete TP".
WEH list: If you check this option, you reverse the destination's axis (X and Y) because in WowEmuHacker's teleport list, X and Y axis are reversed. **If you want to use a WowEmuHacker's list**, you'll have to check if this teleport list respects the conditions bellow:

The teleport list must be composed like that:

[Name of the destination]
*Type:=*Whatever you want (This line is only here to make the program compatible with WEH lists)
*MapID:=*ID of the map
*Xpos:=*X coordinate
*Ypos:=*Y coordinate
*Zpos:=*Z coordinate
*Comment:=*Comment.. ^^

You have to keep the same file's name and extension (.ini).
But as I said, you don't need to use this if you use the teleport list who's included with the program.

To teleport, you just have to click on a destination and then, click on **"Teleport"**.

V. [Other]

On top: Put the window in the foreground.
Transparence: Make the window transparent.
Reset: Reset all the program's options.
"WoW List": If you launch several WoW, you'll be able to choose wich WoW you want to cheat on by selecting his PID (writed in the top right hand column (on screenshots, 3 WoW are launched))
Settings: Allow you to change some settings:

- language

- use default interface

- keep functions activated after closing program

- activate some functions at launch

You must start the program when you're character is in game.
For Vista/Seven users, you'll may have to start the program with admins rights.

Extract the files before launching the program !
